WHO ARE WE?

The Beanies4Babies was created by a group of medical students from the UFS. The tiny miracles who come through these doors of the NICU inspired us to reach out and make a difference.

OUR DREAM

Our dream is to provide comfort and support to premature infants admitted to Pelonomi and Universitas NICU by providing each infant with his/her own pair of knitted socks and beanies.

This will be given to them as soon as they arrive in the NICU and will be taken home with them when they are discharged.

REASON

Premature babies should be kept warm because when cold they use their energy to generate heat. Energy should be used to grow and to get strong. A premature baby's head is a major area of heat loss and should be covered in a Beanie.
